

## New pet parent adoption kits.

This kit can be given to new pet owners to help them with their new family member.

## How to make the new pet parent adoption kits.

First, you need to start by getting the outside of the kits. You can use towels, fleece blankets, bandana or any kind of fabric. You need to cut and sew the outside fabric to equal a 2 foot by 2 foot square. Once you have the fabric cut and sewn then you can start adding the items you want in each kit. To finish, fold each side over the middle and then each end. You can then take string and wrap it like a package. You also might want to note if its for a Dog or a Cat.

## Dog kits

Things that can go in your kit are collars, toys, can/dry food, puppy pads, bowl or brush.

## Cat kits

Things you can put in your kit are collars, toys, treats, can/dry food, bowls and any kind of catnip toy.

Once you have completed your kits you can donate them to the local shelters in your area to give out to new pet owners.
